1.1.3	3.5	1.2.3	5.2
1.1.4	4.2	1.2.4	3.3
1.1.5	3.2	1.2.5	3.3

### Introduction

## Disposal Schedules are the State Archivist's ongoing permission to dispose of records.

They identify:

- which records have a permanent retention and will be transferred to the Tasmanian Archives
- the minimum time that temporary records need to be kept before they can be destroyed.

#### Authority

Tasmanian government organisations covered by the *Archives Act 1983* (Tas) can only dispose of records with the written permission of the State Archivist.

"Disposal of records" means destroying them, removing them from the creating organisation, or transferring them to the Tasmanian Archives.

#### **Records Covered**

This disposal schedule refers to the records of the Public Health Services (Department of Health).

#### Public Health Services – Background

The Director of Public Health has primary responsibility for a multitude of public health areas including:

- notifiable diseases and contaminants
- immunisation
- food safety
- regulation of tobacco and other smoking products
- regulation of premises (for the purposes of maintaining public health), including the closure of unhealthy premises
- quality of drinking and recreational waters
- compilation and maintenance of public health registers, such as the cervical screening register
- licensing and compliance management of public health risk activities, such as tattooing, body piercing and acupuncture
- licensing and compliance management of regulated systems for the control of legionella.

In order to support the Director in the execution of their duties, Public Health Services has responsibility for delivering programs and services that:

- protect Tasmanians from public and environmental health hazards
- prevent and reduce chronic diseases and injuries
- prepare for and respond to public health emergencies like flu pandemics
- promote good health
- reduce inequalities in health

**Note:** The functional records of radiation protection and the public health laboratory are covered separately under DA 2463.

This schedule does not cover **pre-1960 records**. The disposal of those records should be managed according to the procedures for unscheduled records.

The *Disposal Schedule for Short-term Value Records - DA No. 2158* covers the disposal of short-term value records which are created by most agencies. These documents are usually of a trivial nature or of such short-term value that they do not support or contribute to the business functions of the agency.

Records not covered by these schedules, or other authorised disposal schedules, should be disposed of according to current procedures for unscheduled records.

#### **Responsibility for review**

You are responsible for monitoring legislative or regulatory changes which may affect disposal of records covered by this schedule. If this happens, please tell the Office of the State Archivist because we may need to review the disposal schedule.

#### **Unscheduled Records**

Unscheduled records are records not covered in this or any other disposal schedule and include all pre-1960 records.

Please contact us to discuss procedures to manage these records.

#### You Cannot Destroy Records, Even if the Retention Period has Passed, if:

- they are the subject of a **records retention notice** ("disposal freeze") issued by the State Archivist or your organisation; or
- they may be required for an investigation, inquiry or Royal Commission which is in progress or expected; or
- they may be needed as **evidence** in a current or expected legal matter; or
- they are needed for applications in progress under the *Personal Information*
- Protection Act 2004 (Tas) or Right to Information Act 2009 (Tas); or
- there is a **native title claim** in progress.

If any of these apply, identify all relevant records and keep them until the matter and any following reviews, appeals or actions are complete. This may be longer than retention periods in this schedule.

#### **Records Of First Nations People**

Keep records of First Nations' people if they document cultural connection to place and/or the impact of government policies on individuals, families and communities.

#### **More Information**

- Outsourcing:
- You are responsible for recordkeeping, even if your organisation outsources a function.Retention periods are minimums:
  - The retention periods in this schedule are minimum periods.
    - You can keep records longer where there is a business need for them.
  - Take a risk-based approach when deciding how long to keep records.
- Destruction of records: Destroy temporary records securely and appropriately to the format or medium. Record their destruction in your *Register of Records Destroyed*.
- Transfer of records: Transfer permanent records to the Tasmanian Archives, in line with procedures.
  Legal deposit:

Follow <u>National edeposit</u> (NED) guidelines for lodging print, digital and audio-visual publications, including government publications, under legal deposit legislation.

• Legislation: This disposal schedule is issued under the *Archives Act 1983* (Tas).

Also, consider the legislation relevant to your own organisation to make sure you've met all recordkeeping requirements.

#### Other Disposal Schedules

You can use other disposal schedules with this schedule, including:

- Disposal Schedule for Common Administrative Functions (DA2157)
- Disposal Schedule for Short Term Value Records (DA2158)
- Disposal Schedule for Source Records (DA2159)
- Disposal Schedule for Statutory Governing Bodies (DA2508)
- other disposal schedules relevant to your organisation.

## **Disposal Schedule**

01.01	Permanent Records of Public Health Programs and Major Projects	PERMANENT
	Records of continuing value documenting the development, management and review of public health programs, including major projects which significantly alter the method by which programs are designed, delivered and managed eg the transfer of the responsibility for developing food regulation standards from Tasmania to a federal authority in order to harmonise food standards across Australia (Tasmania	Retain as State Archives

Reference	Description	Status And Disposal Action
	still retains responsibility for regulating the local food industry against the standards).	
	Includes:	
	<ul> <li>final approved program/project design documentation and implementation plans, including establishing priority focus criteria for the program audience (ie who is it that needs/is being targeted by the program?), or that manage the transition of program services during a major project</li> <li>summaries of public and stakeholder consultation</li> </ul>	
	conducted during the design and/or review of programs or projects	
	<ul> <li>submissions from the public or stakeholders which significantly alter the scope, content and/or purpose of a program or project, including those which set precedent for the design of subsequent programs/projects</li> </ul>	
	<ul> <li>final reports and recommendations arising from the review and evaluation of programs or projects</li> </ul>	
	<ul> <li>records of steering committees and/or strategic working parties established to oversee the development and approval of programs or major projects</li> </ul>	
	<ul> <li>decisions to decommission a program/major project, including project plans, communication strategies and other documentation of the finalisation, removal and/or transfer of program services to other organisations. Includes notification to and liaison with any services partners who may have had responsibility for the delivery of program or project services.</li> </ul>	
01.02	Short-term Records of Programs and Major Projects	TEMPORARY
	Records of short-term value documenting public health programs or major projects and their delivery.	Destroy 10 years after action
	Includes:	completed
	<ul> <li>project plans and other facilitative program/project implementation management documentation including the records of project management meetings and working groups for either the commissioning or decommissioning of programs or projects</li> </ul>	
	<ul> <li>review documentation including planning, development of surveys and other evaluation methods, the</li> </ul>	

Reference	Description	Status And Disposal Action
	collection of service statistics and other data, analysis and collation of results	
	<ul> <li>submissions received from the public or stakeholders which do not significantly alter the scope, content and/or purpose of a program or project</li> </ul>	
	<ul> <li>reports and other performance data prepared and submitted regarding the local administration of federal programs or projects, eg national programs to reduce the exposure of children to advertising for unhealthy foods</li> </ul>	
	<ul> <li>reports and other performance data received from funded service providers contracted to deliver program services eg injecting equipment (needle and syringe) provision program service providers</li> </ul>	
	<ul> <li>summary management of grant programs (records which summarise applications received and decisions made)</li> </ul>	
	<ul> <li>successful applications for grants made under a program.</li> </ul>	
01.03	Other Records of Public Health Programs and Major Projects	TEMPORARY Destroy 2 years
	Administrative records documenting the delivery of public health services programs and major projects. Includes but is not limited to:	after action completed
	<ul> <li>drafts and other operational or facilitative documents supporting the design of a program or major project, planning of its implementation or decommissioning, or the design of its review/evaluation</li> </ul>	
	<ul> <li>records of the identification of project resources required for delivery</li> </ul>	
	<ul> <li>mailout lists and delivery tracking of communications with staff and other stakeholders requesting participation or updating on progress etc.</li> </ul>	
	<ul> <li>unsuccessful applications for grants made under a program, and any complaints or enquiries regarding these.</li> </ul>	
02.00	Public Health Monitoring and Reporting	
	The function of monitoring and reporting on public health i issues.	indicators and
	Includes monitoring and reporting on:	

Reference	Description	Status And Disposal Action
	<ul> <li>the health status of the Tasmanian population</li> <li>chronic disease (incidence and impact)</li> <li>levels of physical activity</li> <li>risk factors/determinants of health eg lifestyle choices, h income level, employment status etc.</li> <li>tobacco and alcohol usage (both generally across the pospecifically by pregnant women).</li> <li>Includes data collection and reports on the number of notif (during a year or some other nominated time period) for:</li> <li>sexually transmittable infections</li> <li>vaccine preventable diseases</li> <li>communicable diseases</li> <li>healthcare associated infections.</li> <li>Includes reports produced regularly to track trends in puble efficacy of initiatives, such as the take up of cancer screer at risk segments of the community, as well as those specif commissioned to investigate an aspect of public health the interest/concern eg the review of opioid prescribing in Tas Also includes managing research, surveys and other data initiatives that provide input into monitoring and reporting provide input into monitoring provide input into monitoring and reporti</li></ul>	Action ousing status, opulation and fications received ic health or hing services by fically at is of mania. collection projects. tive Functions - al reports on tive Functions - e reporting on
	<ul> <li>01.00 Community Relations - for records of joint ventures</li> <li>See DA 2157 Disposal Schedule for Common Administrative Functions - 07.00 Government Relations - for records of briefings to the Minister and advice other agencies on significant public health issues</li> </ul>	
02.01	<ul> <li>Permanent Records of Public Health Monitoring and Reporting</li> <li>Records of continuing value that document:</li> <li>programmed reports on public health monitoring eg epidemiology reports, population health survey reports etc</li> </ul>	PERMANENT Retain as State Archives

Reference	Description	Status And Disposal Action
	• ad hoc reports produced to document an urgent or emerging public health issue or threat, including those produced at the request of the Minister eg regarding the recent outbreak of invasive meningococcal disease and the rollout of preventative vaccination projects	
	<ul> <li>research frameworks including hypotheses and methodologies for the collation and analysis of data collected to measure the health and well-being of Tasmanians, or an aspect thereof</li> </ul>	
	<ul> <li>final datasets produced during the measurement of an aspect of public health/epidemiology.</li> </ul>	
	Note: final datasets transferred to the State Archive must not contain information that allows for the identification of an individual participant eg names, birth dates or street addresses. More general information such as age and suburb/region may be included where relevant to the analysis. Final datasets that do contain identifying information that cannot be removed without compromising the integrity of the data must brought to the attention of the State Archivist to be considered for an appropriate period of closure following transfer (ie made unavailable for public reference).	
02.02	Short-term Records of Public Health Monitoring and Reporting	TEMPORARY
	Operational records of public health monitoring and reporting that document:	Destroy 10 years after administrative
	<ul> <li>applications for ethics and other approvals, successful and unsuccessful</li> </ul>	use ceases
	<ul> <li>the development and design of surveys, questionnaires and sampling approaches</li> </ul>	
	<ul> <li>calls for volunteers/participation eg letters to parents of school children requesting volunteers in the iodine sufficiency study</li> </ul>	
	<ul> <li>participant registration, consent and release of data/sampling results for use</li> </ul>	
	<ul> <li>raw data/statistics collected as part of measuring an aspect of public health status/epidemiology</li> </ul>	
	• completed surveys/questionnaires from participants	
	sampling and test results	
	<ul> <li>agreements with other agencies/jurisdictions to receive/share data, including any conditions placed</li> </ul>	

Reference	Description	Status And Disposal Action
	upon its use eg arrangements to receive air monitoring data for public release via the website.	
	Note: if an agreement with another agency or jurisdiction stipulates a different retention period as a condition of receiving the data for use, then that agreed retention period supersedes the provisions of this class.	
02.03	Other Records of Public Health Monitoring and Reporting	TEMPORARY
	Facilitative or administrative records of public health monitoring and reporting, including:	Destroy 2 years after action completed
	<ul> <li>summary performance or other data prepared for delivery to the public eg information made available on the website or other communication channels about current public health issues or concerns, such as weekly updates on influenza infection rates</li> </ul>	
	<ul> <li>drafts and other operational or facilitative documenting supporting the collection of data/statistics and the development of public health monitoring reports e.g interview/sampling/visit bookings, interview notes transcribed or summarised elsewhere etc.</li> </ul>	
	<ul> <li>mailout lists and delivery tracking of communications with public health monitoring and reporting stakeholders, including to those that contribute data or service/activity information.</li> </ul>	
03.00	Public Health Regulation and Compliance Managemen	nt
	The function of regulating activities, entities, services and may have a direct impact on public health, including the m compliance with the provisions of legislation, regulations a approvals/licences.	nanagement of
	Regulated activities, service or products include:	
	<ul> <li>food manufacturing, preparation and service (food safety</li> <li>the sale of tobacco products</li> </ul>	y)
	<ul> <li>the dispensing of scheduled substances (pharmaceutica</li> <li>the quality of drinking water and recreational water</li> </ul>	lls)
	<ul> <li>use of contaminated land (whether contaminated with kr environmental contaminants)</li> </ul>	nown or emerging
	<ul> <li>the safe storage and use of radiation sources (equipmer material) (see cross-reference below)</li> </ul>	nt and radioactive
	<ul> <li>the administration of vaccinations</li> <li>providing injecting equipment and disposal services</li> </ul>
